- Wheels for easy mobility
- 20+ games organized by functional goal

Combine ReTouch, ReJoyce and ReGrasp for Ultimate Fun and Comfort.

Rehabtronics builds a range of products to help people recover movement after central or peripheral nervous system injury or disease. Combine ReTouch with ReJoyce and ReGrasp for an integrated and versatile solution for upper body exercises. The full ReHab system includes functional assessment (RAHFT), ADL training, visual and cognitive task, and Neuromuscular Electro Stimulation (NMES) therapy. It's a complete accessible and affordable solution for hospitals, rehabilitation centers and physical therapy centers.

Note: ReTouch is not a medical device.
